Electrical World

A Review of Current Progress in Electricity
and Its Practical Applications

Volume XCVI

July 5 to December 27, 1930

McGRAW-HILL PUBLISHING COMPANY, INC.
Tenth Avenue at Thirty-sixth Street
NEW YORK CITY

General Alphabetical Index

PAGES BY ISSUES

1 to 48	July	5
49 to 96	July	12
97 to 146	July	19
147 to 194	July	26
195 to 238	Aug.	2
239 to 282	Aug.	9
283 to 328	Aug.	16
329 to 372	Aug.	23
373 to 416	Aug.	30
417 to 460	Sept.	6
461 to 504	Sept.	13
505 to 550	Sept.	20
551 to 622	Sept.	27
623 to 670	Oct.	4
671 to 714	Oct.	11
715 to 758	Oct.	18
759 to 802	Oct.	25
803 to 846	Nov.	1
847 to 890	Nov.	8
891 to 934	Nov.	15
935 to 978	Nov.	22
979 to 1022	Nov.	29
1023 to 1066	Dec.	6
1067 to 1110	Dec.	13
1111 to 1154	Dec.	20
1155 to 1198	Dec.	27

(Ed) Editorial. * Illustrated. (N) News.

A

Accidents and Accident Prevention:
Accident statistics should all be on same basis 1136
Codes should not hamper progress. R. M. Boykin 959
Danger sign, demountable for line construction *171
Safety—an operating responsibility. W. R. Loyd 65
Wire menace to airplanes to be studied (N) 99
Wisconsin Public Service wins safety prize (N) 764
Accounting—Building record card. C. W. Evans 485
Advertising—Electrical information needs advertising locally 1052
Air gaps—Increasing the strength (Ed) .. 634
Airport—Beacon advertising on the coast (N) *379
Denver Airport Lighting. F. S. Peterson *259
Lights tip over when struck by plane. *846
Study of power lines in relation to airports (N) 1161
Alignment charts solve sag problems. D. C. Stewart 518
American Electric Railway Association—Meeting at San Francisco (N) ... 4
American Electrochemical Society—Changes its name (N) 627
American Institute of Electrical Engineers:
Electrification interests meeting (N) .. 717
Louisville meeting (N) 980
Portland, Ore., meeting (N) 421
Toronto program emphasizes rationalized system insulation (Ed) 11
American Society of Mechanical Engineers—Discuss power interchange 1083
Power interchange with industrial plants *1093
Power production occupies meeting (N) 6
American Society for Testing Materials—Reports on electrical materials (N) 56
American Welding Society—Methods of testing discussed (N) 627
Annealing, electric *494
Appliances:
Boston Edison to sell ranges at list, installed (N) 850
Concurrent appliance-sale idea steps forward (Ed) 292
Customer stockholders — A receptive appliance market. E. P. Young .. 484
Pennsylvania high court sustains merchandising (N) 242
"Selling" the salesman 223
Swiss extend appliances 15% in year 310
Will Sears, Roebuck be the first to sell complete electrically equipped home? (Ed) 12
Armorclad gear finds favor (Ed) 900
Ash, see Coal.
Association of Electragists International—Annual convention (N) 330
Atom, seeing the (Ed) 61
Automatics are proved (Ed) 561
Automobile plant (Nash Motors) adopts 26 kv. for economy *83

B

Battery—Drumm storage—charges at 600 amp. rate 778
Heavy-duty battery with higher capacity 1110
Blower reduces motor maintenance in cork grinding 178
Boilers:
Arc-welded boilers not far off 306
Deepwater experience amplified. K. M. Irwin 1171
Deepwater and Gilbert 1,200 lb. stations report upon performances 1044
Designed for multiple fuel service *860
Dinner inside boiler in the Northwest (N) *197
Electric welding of boilers advocated .. *694
Hell Gate installs boilers (N) 1157
High-pressure, high temperature boiler installations (Ed) 107
Loeffler boilers improved 164
Mercury boiler gains fresh commendation (N) 1114
Mercury-vapor unit a commercial success. T. H. Soren 35
Pulverized coal-firing systems compared 208
Purity of feedwater best determined by conductance 431
Reducing boiler insulation *1042
Bolt—contact resistance recuded 75% ... *1186
Book Reviews:
Alternating currents. C. C. Bishop .. 496
Alternating-current bridge methods. B. Hague 450
American industry and commerce. E. D. Durand 1144
Die Asynchronen Wechselfeldmotoren. G. Benischke 1144
Buhnenbeleuchtung. A. von Engel .. 748
Commercial A.C. measurements. G. W. Stubbings 1012
Eiserne Gittermaste fur Starkstrom-Freileitungen. Wm. Taenzer 272
Electric and magnetic circuits. E. N. Pink 184
Electric overhead traveling crane design. W. A. Barson 1012
"Electrician" annual tables of electricity undertakings, 1930 228
Elektrisch. gleichrichter und ventile. A. Guntherschulze 968
Elektrobetrieb in der textilindustrie. Wm. Stiel 272
ETZ gesamtinhaltsverzeignis. (Ed) by F. Moeller 968
Experimental electricity. R. H. Walters 1144
Forschung und Technik 748
Forschungshefte der studiengesellschaft fur hochstspannungsanlagen e. V. (Ed) by Prof. Matthias 184
Foundations for human engineering. C. R. Gow 1144
Generating stations. A. H. Lovell .. 968
Grundlager und Entwickelung der Energiewirtschaft Osterreichs 450
Handbook of English in engineering usage. A. C. Howell 1012
High-voltage oil circuit breakers. Wilkins & Crellen 496
Introduction to the study of wave mechanics. L. De Broglie 968
Lehrbuch der Praktischen Physik. F. Kohlrausch 450
Mathematics for electricians. M. H. Kuehn 450
Mathematisches praktikum. Dr. Horst von Sanden 228
Mercury-arc power rectifiers. Marti & Winograd 968
Modern physics. Theodor Wulf 228
Die Nordischen Wasserkrafte. A. Ludin 968
Objective type tests in engineering education. C. V. Mann 1012
Photo cells and their application. Zworkyin & Wilson 272
Plant location. W. G. Holmes 450
Predpisy ESC 1930 496
Principles of engineering economy. E. L. Grant 184
Problems in public utility management. Philip Cabot 184
Rechtsgrundlagen der Oeffentlichen Elektrizitatswirtschaft in Deutschland. E. Henke 1144
Relais und Schutzschaltungen in Elektrischen Kraftwerken und Netzen. R. Rudenberg 1144
Die Relaissteurung der Modernen Starkstromtechnik 748
St. Lawrence waterway project. G. W. Stephens 748
Science and the scientific mind. Saidla & Gibbs 1012
Selektive schutzeinrich tungen fur hochspannungsanlagen mit anleitung zu ihrer projektierung. M. Walter. 184
Selektivschutz. F. Kesselring 1012
Statistischer Bericht, 1929 1012
Stock market theory and practice 748
Street-lighting practice. Ward Harrison and others 450
Structural aluminum handbook. Alum. Co. of America 272
Swiss transmission lines 748
Taschenbuch der drahtlosen telegraphie und telephonie. F. Banneitz 228
Die Wasserkraftwirtschaft Deutschlands 496
Wave mechanics. A. Sommerfeld 1144
Die Wirtschaftlichkeit der Energiespeicherung fur Elektrizitatswerke. Dr. I. L. Musil 496
Die Wirtschaftliche Erzeugung der Electrischen Spitzenkraft in Grosstadten. E. Krohne 1012
X-rays. B. L. Worsnop 272
Boulder Dam:
Arizona fights on (N) 716
Arizona files her suit (N) 673
Federal Power Commission rejects 26 Colorado River applications (N) ... 100
Last obstacle removed in way of construction (N) 3
Work to be speeded up (N) 895
Brass melting 346
Brazing—Electric, portable equipment ... *416
Resistance brazing proves economical and strong *655
Breaker, see Coal.
Broadcasting, television, communication .. 33
Brush holder prevents commutator sparking 504
Burners, multiple fuel *652
Busbars and Buses:
Busbar bending machine for one-man operation *978
Conduit simplifies bus feed *1047
Edgewise bends *613
Generators direct-connected to "flat" 12-kv. switchyard *773
Interlock for bus compartments *613
Is the generator bus doomed? (Ed) .. 61
Metal-clad 2,300-volt bus replaces open runs *821
Miniature buses, value 643
Minimizing breakers in exciter layouts. J. B. MacLean *397
Motor-generator obviates splitting power plant bus. M. M. McIntire .. *74
Bushings, device to protect against expansion *194
Business Conditions:
Business and government (Ed) 1031
Business recovery under way 439
False economy comes high (Ed) 945
Helping business help itself (Ed) 1165
No time for armchairs (Ed) 291
No time for legislative pills (Ed) 943
On up-grade (Ed) 381
Self-restraint in business. C. L. Collens 830
Business news and markets ... 43, 92, 140, 190, 234, 278, 322, 369, 456, 500, 544, 619, 666, 710, 754, 798, 842, 886, 930, 974, 1017, 1062, 1106, 1194

C

Cable:
"Angle duct." J. J. Shoemaker *348
Barrel used in laying submarine cable. *123
Cementless terminator for underground *238
Compound tests with discardable containers *1056
Concrete cable tunnels show economy. R. A. Cole *586
Connectors with wedge grip 372
Continued progress for underground .. *572
Copper versus aluminum in Ontario building (N) 763
Distinguishing braids for control cable. J. B. MacLean 646
Earth temperatures analyzed for cable rating use 441
Engineering for better lines at lower cost *584
Flexible connections facilitate maintenance *1179
Great Britain now has 66,000 volt submarine cable (N) *1072
Grips show savings in wire pulling .. *643
Kenetron bridge locates power cable faults. F. H. Gooding 164

Eng. Lib
Wabr

Laying cables under Baltimore harbor (N) *55
Lead cable creepage proportional to antimony content 225
Long-span conductors cut to final length at mill 123
Machine lays cable in single operation. *504
Mississippi River crossing requires 3,780 ft. span *582
New control-cable standard based on practical needs. G. Sutherland....1182
Non-metallic sheathed parkway..... 96
Oil rehabilitates joints of twenty-year-old cable. E. F. De Turk..... 876
Pulling both ends of 5,084 ft. span at once. J. E. Housley..... *822
Quality is improving 691
Reduces cable ionization by super-vacuum process. Rosch & Burd.. *1132
Reels carried by trailer and tractor (N) *53
Reinforcing a bridge for cable crossing *961
Riser protection *1008
Sag measured accurately *372
St. Louis Company's 75-kv. submarine cable (N) 940
75-kv., three-conductor, oil filled cable. E. F. Nuezel *1088
Sheath currents in single-conductor cables. C. W. Evans 957
Short cable lines require lightning arresters. E. Beck *1003
Steel reels, light weight 846
Suspension clamps 47
Transmission and distribution 32
Trunnion clamps for cable suspension. *282
Two 100-amp. cables equals one 200-amp. feeder. G. F. Speer..... *347
Underground cable racks 1110
Vancouver-Portland high-voltage submarine cable (N) 983
Why buy single-conductor cable for type H terminals. E. F. Nuezel.... *398

Canada:
Dominion and Ontario governments clash over water power (N)..... 54
Insull interests enter Manitoba territory (N) 465
Construction program for winter (N). 763
More power for Winnipeg (N)..... 894
Power growth in the Dominion (N).. 103
Canal—Welland Canal—traffic speeded by adequate lighting *1125
Cars, riderless, carry coal from quarry to mill (N) *1115
Castings, electric furnace produces from scrap. N. L. Turner..... 68
Cement plants, electrical characteristics... 227
Central stations—Growth in 1930 (N)... 552
Chamber of Commerce of U. S. — Water power referendum (N) 897
Chromium plating installations require protection (Ed) 1121

Circuit Breakers:
Air breakers protect circuit in rewired building 114
Breaker to replace switches and fuses 144
Circuit breaker duty affected by speed. C. L. Denault *913
Expulsion breaker solves customer service problem. S. J. Spurgeon.. *480
Filming the breaker are *438
Giant circuit breaker for 220 kv. system (N) *331
Minimizing breakers in exciter layouts. J. B. MacLean *397
New ideas in breaker study (Ed).... 990
Oil circuit breakers 622
Oil circuit breakers for high-voltage use *326
Pole-top breaker operated by extension rod *222
220 oil circuit breakers operate in 8 cycles *1083
Truck-type air breakers save space at Lynn. J. H. Wells *950
Clamps for live-line service 758
Clutch permits high-torque starting..... 934

Coal:
Electrified coal breaker *782
Fly ash recovered by means of stack sprays *264
Pulverized coal-firing systems compared 208
Pulverizer *1066
Surcharge discussed in Boston and New York (N) 4

Code—Limitations as a wiring guide. G. H. Stickney 1005
Should not hamper progress. R. M. Boykin 959
Colorado River, see Boulder Dam.
Condenser—Uniform pressure obtained by chlorination 906
Conduits—Concrete cable tunnels show economy. R. A. Cole *586
Conduit simplifies bus feed *1047
Connectors—Cast-to-size connections for copper tube buses *1198
Positive-grip for heavy-duty service.. 890
Solderless 670
Construction programming. E. A. Crellin. 788
Construction shows faith in future (Ed).. 813
Contact—Bolt-contact resistance reduced 75% *1186
Full-floating self-aligning pressure contact *1198
Floating for disconnects *144
Contactors—Magnetic for heavy duty service *47
Reversing contactors for single and three-phase motors 326
Contractors—Code of ethics, abridged..... 693
Manufacturer relations. C. L. Collens. 523

Control:
Automatic substations and supervisory control 28
Coal breaker has individual drives, interlocks and automatic control.... *782
Control room of Connecticut Valley Power Exchange *994
Denver ariport lighting control 260
Generator-voltage control in 20 processes. S. Martin *266
Guiding expansion of load-dispatching organization (New England Power Co.). C. P. Corey 160
Interlocked control assures service on dual feed. H. L. Crumley *907
Motors, control meet special needs.... *602
Remote control over iron wire. A. F. Gettelman 117
Requirements of 20 processes that generator-voltage control meets. S. Martin, Jr. *172
Simplifying multi-unit load switching. E. V. Ellett *211
Speed control for A.C. motors. A. M. Rossman 304
Speed controls for D.C. motors. L. F. Miller *400
Supervisory for San Antonio. B. Gouger *1166
Synchronous motor bank controls plant power factor *834
System eliminates pump and motor for fire tank *792
Variable voltage control for anti-bearing machines K. L. Howe..... 915

Control Devices:
Audio-frequency control for automatic machinery *670
Automatic control at Norwood generating station. F. M. Nash..... *342
Centrifugal draft-fan control *1138
Controllers for presses, folders and box machines *890
Distinguishing braids for control cable. J. B. MacLean 646
Electric automatic and remote control 416
How special motors and control solved continuous hot-rolling problems. R. H. Rogers *352
Magnet-operated brakes for heavy duty motors *890
Range-water heater campaing based mill of Aluminum Co. *519
New control-cable standard based on practical needs. G. Sutherland.... 1182
Photo cells versus observation towers (Ed) 901
Push-button station, explosion proof *96
Rolls in steel mills automatically adjusted *978
Soldering iron with heat control *144
Synchronized motor operations improve linoleum production 390
Temperature regulators and recorders. *1037
Thyratron tubes control tension of wire in reeling *169
Conveyor in newspaper publishing house.. *429
Cooking, electric — How Wesleyan Seminary benefited by adopting electric cooking. Wirt S. Scott *656
Range-water heater campaign based on customer viewpoint 1084
Typical bake oven installations analyzed 649

Costs:
Banked transformer structures built for $280 to $314. H. L. Livingood 581
Buying for merit (Ed) 560
Economy and the engineer. P. L. Battey *998
Electric heating—actual book values from users. W. S. Scott..... 213
Incubus of distribution costs (Ed)... 768
Justifiable load-building expense. J. R. Cravath 177
Lower costs desirable in system investment? 823
Pipe line cost analysis 702
Production methods and investment cost (Ed) 988
Profits in merchandising losses 738
Saving by modernization. H. L. Ziegenbein *700
Service installation cost reduced 50 per cent. Yensel & Thomas..... *124
Street lighting costs. R. J. Drake.... 75
Textile mills electrified for efficient production. Root & Lawrence..... *574
What sales manager can do to reduce distribution costs. S. B. Hood.... 776
Crane with individual wheel drive..... 144
Crucibles for induction furnaces..... 846
Customership ownership—Customer stockholders—a receptive appliance market. E. P. Young 484
Cutouts — Automatic isolates ruptured loops *238
Open expulsion cutouts for rural service *1110

D

Dams:
Bagnell Dam (N) *1069
Bagnell Dam wins in Federal Court fight (N) 557
Boulder Dam takes name Hoover Dam (N) 507
Cofferdam to divert a river (N)..... 243
Diablo Dam cost increased (N)..... 853
Diablo Dam dedicated (N) *418
Diablo Dam turned over to Seattle (N) 469
Electric screens divert fish. J. E. Yates *216
Harriman Dam—Tablet to Harriman (N) 763
Hoover Dam—Budget for building (N) *553
Hoover Dam cost (N)..... *1159
Hoover Dam winning bid made public (N) 761
Indianapolis obstructs power company's plans (N) 557
Missouri Dam—Attempt to enjoin fails (N) 3
Niangua River Dam almost finished (N) 984
Precast dam closes narrow channel.. *591
Rio Grande and Brazos River to have dams (N) 1117
Saluda Dam finished three months ahead of schedule (N)..... *54
Saluda River plant in full operation (N) 1114
Saluda River power house and completed dam (N) *423
Stewart Mountain Dam (N) *152
Design and construction number Sept. 27 issue.

Dielectrics:
Breakdown apparently influenced by space charge (Ed) 340
Dielectric attack shifts to fundamentals (Ed) 990
Electric conductivity and dielectric loss (Ed) 383
Insulation theorists exchange research data (N) 893
New knowledge likely to be unfolded (Ed) 108

Distribution Systems:
Automobile plant (Nash Motors) adopts 26 kv. for economy *83
Cables, transmission and distribution. 32
Chance for experiment (Ed) 681
Distribution changeover without interruptions. F. S. Jones 311
Economical conductor size (Ed) 1034
Electricity supply in the world's largest building (Marshall Field Bldg.). M. G. Seim *474
Georgia Power Company makes study of Atlanta distribution. J. M. Flanigen 62
How to start a network. D. K. Blake 115
Municipalities gain from network distribution. A. Hussey *770
New layout cost less than reinforcing old 520
Reliability dictates design of network vault *1173
Split-fiber ducts simplify underground distribution *965
Supervisory for San Antonio. G. Gouger *1166
Supply and distribution for 22,000-hp. industrial load. F. A. Roehrig. *606
Vertical A.C. networks for tall buildings *1174
Drawings—Proper procedure expedites design work. W. B. Morton..... *1082
Dredge, gas-electric irrigation. M. M. McIntire *179
Drilling machine to mount on tractor.... 714
Drilling, oil well—Electricity versus steam 77
Drydock — Supplying power to floating dry docks. E. Kun..... *1126

Ducts and Manholes:
Concrete cable tunnels show economy. R. A. Cole *586
Concrete duct cheaper when feasible.. 536
Continue progress for underground.. *572
Co-ordinating electrical nerves with vehicular arteries (Ed) 204
Duct line relocated on bridge during construction 641
Ducts of split-fiber *965
Facilitating inspection of ground rods. *919
Making it easier to add manholes to duct lines *684
Municipalities gain from network distribution. A. Hussey *770
St. Louis puts out duct fire quickly (N) 244
Two 100-amp cables equals one 200-amp. feeder. G. F. Speer *347
Dynamo—Old Edison "Jumbo" goes to Dearborn (N) *554

E

Electrical Guild of North America (Ed). 471
Organized (N) 420
Electrical World—Brief history of (N).. 9
Electrification—Electrify textile mills for efficient production. Root & Lawrence *574
Great Britain electrifies. L. W. W. Morrow *250
Ice manufacturing plant electrified. F. Fink *962
Empire State Gas & Electric Assn.—Urges reforms at meeting (N) 555

Employees:
Building the industry (Ed) 1075
Engineering helps on unemployment (Ed) 1076
General Electric employment plan significant (Ed) 11
Personnel problems (Ed) 426
Stabilizing employment. G. Swope..1169
Unemployment—A co-operative answer (Ed) 1031
Utilities and technological unemployment (Ed) 680
What we expect in college men. B. Gherardi 1051

Energy:
Domestic electric bill claims smaller share of income 919
Energy losses used for heating station *1131
Hot water usage and energy consumption *868
Interstate energy—A commodity or a service? (Ed) 989
Percentage of interstate transmission 15 to 20 (N) 1160
Price has decreased since 1913 549
Statistics on amount of energy used by power plant auxiliaries 163
Three-frequency supply for industrial plant. F. H. Penney 271

Engineering:
Dollar engineering governs (Ed)..... 559
Economy and the engineer. P. L. Battey *998
Look for engineering alternatives (Ed) 157
State institutions (Ed) 472

Engineers:
Can the architect and engineer work together? Earl Whitehorne 391
Educators and industrialists (Ed)..... 767
Fifty years as electrical engineers (N) .*198
Human products for technical industries 779
Status of the young engineer. H. B. Smith 14
What we expect in college men. B. Gherardi 1051
Engines—Diesel costs misleading (Ed).... 60
Excavating—Comparative excavating costs 494
Tower excavating machine (N).....*677

F

Faraday celebration (Ed) 560

Federal Power Commission:
Accountants dispute Carolina Power & Light Co. pre-license cost figures (N) 462
Attorney-General passes upon power board issue (N) 631
Chief accountant recommends cut in cost figures of Clarion Power (N).. 375
Clarion River Power Co. asks injunction (N) 809
Columbus Electric & Power Co. challenges Board (N) 507
Conflict over figures on Table Rock project (N) 462
Issues cause agitation (N)..... 673
Jadwin declines Hoover's nomination (N) 98
Jadwin to head (N)..... 2
Minnesota Power & Light costs to be cut (N) 1072
Mitchell backs state rights (Ed).... 769
Mitchell says board cannot act on esthetic grounds (N) 50
Mokelume River Project (N).....1160
New Commission confirmed and takes office (N) 1156
New personnel (N) 1027
Nominees indorsed by committee (N).1112
Officials talk about accounting and scenery (N) 374
Permits for recent projects given (N).1160
President's nominees not confirmed as Senate adjourn (N) 149
Projects before commission (N)..... 376
Public ownership men would intervene in suit brought by Clarion River Power Co. (N) 937
Report on affairs (N)..... 53
Sane comment on water power (Ed)..1032
Scenery preservation (Ed) 157
Secretary Bonner resigns, Russel and King dropped (N) 1156
States' responsibility is stressed (N)..1024
Status still unaltered (N)..... 331
Tennessee Valley—to cancel entries for (N) 197

Federal Trade Commission:
Better late than never (Ed).....1120
Fire nearly destroys building (N).... 419
Georgia Power Co. investigation (N).1025
Interstate power 13.5% (N)..... 553
Investigation of the Southeastern Power & Light Co. (N)..... 936
Open convenants openly made (Ed)..1075

Finance:
Bankers show courage (Ed)..... 767
Gaging the market for new securities (Ed) 291
Insull optimistic 737
Investor wants the facts. Dr. G. C. Cox 697
No conflict between stock and cash dividends (Ed) 1164
Need for a gage of bond market Saturation (Ed) 1121
P. G. & E. exceeds its construction estimates (N) 378
Where stand utility commons? (Ed). 811
Financial and statistical 40, 89, 137, 187, 231, 90, 275, 319, 367, 453, 498, 541, 616, 663, 707, 751, 759, 839, 882, 927, 971, 1014, 1059, 1103, 1191
Fires—"Electric eye" scans fire, puts it out (N) 892
Loose rock reduces oil fire hazard...*949
Or pole eliminated by aluminum paint 829
Fish smoked by electricity.....*958
Fishway — Electric screens divert fish. J. E. Yates *216
At California plant (N).....*201
Ford Motor Co.—forges with electric heat..*902
Forging with electric heat.....*902

France:
Electrical industry doubles every four years 1094
Electrifying steel works (N)..... 200
High-head plant (N) 198
Need for labor-saving devices (Ed).. 248
Rural electrification in France. R. P. Chauvet *877

Frequency:
Consumers Power starts work to unify (N) 5
5 to 200 cycles measured within one-tenth cycle 493
Three frequency supply for industrial plant. F. H. Penney..... 271

Fuel:
Boiler plant designed for multiple fuel service *860
Gas tar as boiler fuel. O. C. Stokke 394
Natural gas and oil as utility fuel...1170
Oil fuel proves efficiency in comparative tests 432
Statistics previous to 1919? (Ed).... 249

Furnaces—Electric:
Automatic control for industrial ovens.1154
Electric gray iron entirely from scrap. N. L. Turner 68
Favors electric furnaces for special steels *1184
Ford forges with electric heat.....*902
Furnace converts scrap into high test cast iron 1138
Furnace for combustion analysis..... 758
User's viewpoint on the electric furnace. F. A. Melmot.....*128
Fuses — Curtails use of potential transformer fuses. E. R. Stauffacher.. 166
Rupturing characteristics of high-tension *870
Self-insulated expulsion *416

Radio:

Adapting radio parts to automatic substations. A. B. Harritt..... 225
Broadcasting reaches tenth anniversary (N) 850
Choke coils eliminate radio interference. A. S. Warner *780
N.E.L.A. asked to act on radio interference (N) 1069
Why the power level of broadcast should be raised (Ed)..... 1165

Railroads—Electrification:

Cleveland dedicates new terminal (N) 5
D. L. & W. R.R. to electrify 67 miles in 1930 (N) 98
Drumm battery interests Free State (N) *285
Drumm battery tests resumed (N).... 985
Italian railways use 3,000 volt D. C. service. Nikolay von Kotschubey. 652
Lackawanna begins service (N)..... 420
N. Y. & N. H. orders ten passenger locomotives (N) 508
Operating costs and savings per 1,000 ton-miles 270
Pennsylvania locomotives on the rails (N) *284
Pennsylvania Railroad arranges for energy (N) 5
Reading program amplified (N).....1028
Reading Railroad advances electrification (N) 331
Three railroads push electrification in New Jersey and Pennsylvania (N) 148
To serve a railroad and a city within a city. C. B. Martin..... *78

Rates:

Boston and Philadelphia rates cut—Sloan for rate cut (N) 240
Capital supply must not be jeopardized. F. L. Carlisle 1079
California commissioner calls rates confiscatory (N) 1028
Chain factories growth may demand equalized rates (Ed) 205
Cheapest supply source is criterion for rates (N) 1071
Clinch the bases for cost allocations (Ed) 59
Commission asks still lower Potomac rates (N) 377
Five cuts since 1926 made by Oklahoma Gas & Electric (N) 511
Georgia has fight over Crisp County plant (N) 465
Georgia Power Co.—Court alters terms of inquiry (N) 627
Georgia Power Company cuts rates (N) 379
Georgia Power protests against rate slash (N) 981
Hartford has three-cent energy rate (N) 850
Hearings not town meetings (Ed).... 515
Inducement rates for capital (Ed).... 724
Maine companies protest wholesale rate (N) 376
Mark Twain and rates (Ed) 855
Martinsville case to set precedent (N) 53
Missouri Company lowers rates in 150 towns (N) 335
Montana—Commission's power to fix rates upheld (N) 377
New York City offered lower rates.. 257
New York hearings near close (N).. 807
New York City—Rate hearing (N).. 468
Norway increases power sales by lower rates. T. N. Schulz 404
Oklahoma towns reduce rates (N) .. 628
One-quarter N. Y. Edison bills are under $1 (N) 332
Oregon orders substantial cuts (N). 199
Pacific Gas & Electric Co. complained against (N) 985
Potomac Electric give rebate to customers (N) 941
Range-water heater campaign based on customer viewpoint 1084
Reductions in different states (N)...1115
Reductions spur sales (Ed) 339
Scranton Electric agrees to a rate reduction (N) 332
Sloan examined in New York rate case (N) 762
Sloan's rate reduction (Ed) 247
South Carolina agitation for uniform power rates (N) 719
Triples residential load despite cheap gas 1038
Uniform and simple rates (Ed) 679
Union Electric rate inquiry under way (N) 807
Utilities in three states plan reductions (N) 155
U. S. Court finds 7.25% return confiscatory (N) 676

Rectifiers—Mechanical rectification with mercury jet wave 526
Mercury-arc rectifiers *733
Mercury-jet wave rectifier now commercial success (Ed) 725

Red Seal applications in 1930..... 861
Refrigeration — Reverses refrigeration process for house heating 315
Testing corn crop's resistance to cold (N) *101
Refrigeration campaign (Ed) 1034
Regulators—Pull boxes improve regulator installations *609
Relays:
Directional relays corrected trouble. Anderson & Dana *448
Mechanically balanced relays protect 60 kv. loop. M. M. McIntire....*822
Multiple relaying minimizes 220 kv. line outages 168
Relaying a medium voltage A.C. network. J. B. Powel 395
Relays and service security 31
Reverse-phase relays not needed for hoists 393
Simple devices permit outside relay resetting. J. S. Brown.....*912
Simplifying multi-unit load switching. E. V. Ellett *211
Two-pole starters with overload relays 416
Research:
"Blue sky" laboratory for G. E. Co. (N) 56
Executive excursion in research a hopeful sign (Ed) 724
High-head laboratory for Safe Harbor models (N) 630
Laboratory of Stanford University..*209
Price that's paid for lack of market knowledge (Ed) 900
Resistor — Adjustable for high-wattage service 548
Non-inductive resistors 1066
Rivet cutting, electric 483
Roller eliminates tamping by hand..... 372
Rotary converters—Converters for railroad-office-hotel-apartment supply in subterranean substation *81
Rubber—Electric heat cuts rubber specialties. M. Crane 224
Selection of motors for difficult starting, heavy-duty, fluctuating loads in rubber mills. C. E. Buchan *118
Rubber glove test methods recommended by N.E.L.A. 522
Rural Electrification:
Alabama has new rule for rural extensions (N) 102
Balance coils show economies for distribution. R. J. Owens 521
Brakes on rural service or full speed ahead? (Ed) 680
Building rural lines for $1,300 per mile. S. C. Murray 614
Cultivator used on small farm.....*1008
Farm project water heaters join electric and sun energy. G. W. Kable.1143
French rural electrification. R. P. Chauvet *877
If rural service is to pay. H. C. Thuerk 642
Illinois customers for 1929 (N) 201
Levitt demands free rural-line extension (N) 1161
Line costs sought by Oregon Commission (N) 102
Nebraska rural electric act again declared void (N) 333
New construction practices cut rural distribution costs. N. Stahl *817
New York's rural service up 75% in four years 307
Ontario farm line increases (N..... 468
Rural programs require executive guidance. E. C. Easter 880
Service expands in Great Lakes states (N) 851
Service progress in four commonwealths (N) 334
Some farmers spend $40 monthly for electricity (N) 851
Studies of rural line construction.... 256
Twelve functions essential in farm service department 442
Virginia utility manager reports on rural activities 363
Virginia's plan for extending rural lines. C. E. Seitz 182
Russia—Soviet activities (Ed) 203
Soviet to have five more big units (N) 289

S

Safety, see Accidents and accident prevention 96
St. Lawrence—Canadian engineers issue report (N) 51
Names advisers on market (N)..... 677
St. Lawrence Commission — Asks power companies to co-operate (N)..... 554
St. Lawrence River—Commission appointed by Roosevelt (N) 286
Haig and McGrath issue statement (N) 1157
Sales:
Capitalizing the depression (Ed) 855
Factors in residential consumption. P. G. Dingledy 301
Profits in merchandising losses..... 738
Pros and cons of reciprocity and bargaining 206
Range-water campaign based on customer viewpoint 1084
Reciprocal buying under fire (Ed).... 857
Revenue and voltage. M. De Merit.. 436
Saving by load-factor selling (Ed)... 205
"Selling" the salesman 223
Those sales executives the industry is waiting for (Ed) 109
What sales manager can do to reduce distribution costs. S. B. Hood.... 776
Word of warning (Ed) 471
Sand—Keeping out sand from turbines and forebays. R. P. Waite 535
Santo Domingo—Damage to power plants (N) 464
Scenery preservation (Ed) 157
Scotland — Central Scotland Electricity Scheme. F. C. Wells *832
Scrap—Electric furnace produces castings from scrap. N. L. Turner 68
Service:
Competitive age introduces value of service (Ed) 987
Cost comparison of service and meter installations 126
Electric repair shops relieve maintenance worries 704
Meter and service costs cut by practices beyond the code. D. M. Thomas.. 918
Pros and cons of reciprocity and bargaining 206
Publishing demands split-second service reliability. H. Osborn *428
Shipping—Protecting power equipment during transportation. R. H. Ewry ..*814
Ships, electric — U. S. Merchants fleet growing (N) 334
Short circuits—Faults located easily by high-tension finder 193
Grilled vents exclude rodents.....*997
Rupturing characteristics of high-tension fuses *870
Society for the Promotion of Engineering Education—Elects officers (N)..... 154
Space economies at Perth Amboy.....*564
Sparking in air (Ed) 723
Starters:
Across-the-line 2,300 volt starter.... 282
Automatic starters for two-speed motors 460
Dust-tight inclosures for 504
Oil-immersed starters with overload protection *1066
Remote-controlled magnetic starters..*460
Reversing starters for induction motors 1110
Small motor starter with magnetic contactor *670
Statistics:
Energy used by power plant auxiliaries 163
Factors in residential consumption. P. G. Dingledy 301
Oil burner statistics 327
Standby plants cold-banked — Southeastern district of N.E.L.A..... 360
Steam:
Alabama Power uses Gorgas No. 2 for first time (N) 1029
Base-load steam for hydro system.... 165
British-made unit for Delray No. 3 is ready (N) 379
Deepwater experience amplified. K. M. Irwin 1171
Desuperheater *823
Electricity versus steam for oil well drilling 77
Gorgas steam plants come to the rescue (N) 287
Hydro plant outage one-third that for steam 1099
Oregon plant adds turbo-generator (N) *375
Oregon regulators like steam-plant reliability (N) 245
Peak-load accumulators supply 50,000 kw. demand 393
Plant Atkinson dedicated (N) 765
Supply of steam as a builder of electric load (Ed) 59
San Joaquin Co. to build plant (N)... 896
Survey of Southeastern district of N.E.L.A. standby plants cold-banked 360
Tie lines and steam plants offset water shortage *1122
Value of steam reserve shown by drought in South (Ed)..... 425
Waukegan's new unit (N) *806
What price steam economy? (Ed).... 725
Steel—Favors electric furnaces for special steels *1184
Stereotyping, electric *424
Stockroom, perambulating *85
Substation:
Arkansas substation on wheels (N)..*765
Automatic off-peak heating for unattended substation *772
Automatic substations and supervisory control 28
Automobile plant (Nash Motors) adopts 26 kv. for economy *83
Boston station provides type of automatic load control. E. V. Ellett..*211
Departure in substation design. Morton & Payne *740
Distribution substations. Hentz & Zerbe *594
Economy of ground area in city substation *1176
Energy losses used for heating station *1131
Generators direct-connected to "flat" 12-kv. switchyard *773
Getting results with minimum material *869
Heater floor warms substation operators *1092
Hillside location *558
Interlocked control assures service on dual feed. H. L. Crumley *907
Lighting outdoor substation *746
Low-cost substations need not be unattractive *690
No more noise. A. S. Hoefflin *1093
Power customer's stake in the industrial substation. K. D. Hamilton..*1048
Publishing demands split-second service reliability (Daily News). H. Osborn *428
Radio parts adapted to automatic substations. A. B. Harritt 225
Steel cost should not hamper design (Ed) 514
Substation split between basement and roof *612
Temple substation as tie point for 66 v. and 60 kv. sections of Texas Power & Light. D. B. McDonald...*960
To serve a railroad and a city within a city. C. B. Martin..... *78
Suburban Light & Power goes into receivership (N) 631
Switches and Switching:
Air-break switches, electrical operator 193
Cabinets, flush type for toggle switches 194
Combined switch lock and "hold-off" warning *1087
Combined with outlet cover..... 622
Cutout convertible into disconnect switch *372
Design originality of disconnecting switches (Ed) 426
Disconnect switch design *282
Disconnect switch with balanced blade *47
Disconnect switches for pipe frame mounting *504
Disconnecting switch with locking device *238
Distribution panel *758
Float switch, automatic, for pump-motor control *890
Generator-Switchyard construction improved *566
Guiding expansion of load-dispatching organization (New England Power Co.) C. P. Corey..... 160
Gang-operated switch with heavy ampere capacity *96
Magnetic switches for large size motors *548
Manual switch for pilot control..... 282
Metal-clad switchgear progress.....*562
Metal-inclosed switches *934
Miniature control switchboards (Ed) 292
Outdoor, accessible fuse meter service switches 504
Panel improved in appearance.....*966
Precision time switch 460
Push-button station for machine service *1198
Push-button starting switch protects small motors 194
Push-button switches 978
Selector switches with safety locks...*372
Shall switchboards be billboards or pages? (Ed) 812
Simplifying multi-unit load switching. E. V. Ellett *211
Starter and switch combined in cabinet *548
Starting switch *758
Steel cubicles incorporate safety and compactness *1080
To prevent misgrounding *778
Tower type switching station..... 215
Switzerland-electrical development. L. W. W. Morrow *308

T

Tank—Scalding tank boosts rural load in New York. C. H. Churchill.....*641
Vertical oil storage tanks.....*600
Tape — testing varnished cloth tape. Warren Master *534
Taxes—Alabama sues company for tax on power exported (N) 853
Britain faces facts (Ed).....1163
Export tax demanded on Alabama energy (N) 626
Minnesota tax board increases taxes (N) 981
Telephone — Illinois case — injunction set aside (N) 1159
Television, broadcasting, communication... 33
Temperature of earth analyzed for cable rating use 441
Terminal lug 238
Terminals, type H—why buy single-conductor cable for? E. F. Nuezel....*398
Testing and tests—Varnished cloth tape testing. Warren Master *534
Portable equipment makes oil tests in field 1198
Portable kenotron housing design. C. W. Evans *1178
Textile mill electrification. Root & Lawrence *574
Thermometer records temperatures in ducts 670
Thermostat, quartz rod *193
Thomson, Elihu—honored (Ed) 634
Honored (N) 625
Thyratron tubes control tension of wire in reeling *169
Time-delay devices. D. W. McLenegan....*433
Timer, work-cycle *846
Towers, see Transmission.
Tramway—special motors increase speed.*650

Transformers:

Aluminum conductors for industrial substation *651
Banked transformer structures built for $280 to $314 581
Compensator circuit for feeder regulators. E. R. Woefert.....*346
Current transformer eliminates errors.*622
Current transformers for bus installations *1022
Curtails use of potential transformer fuses. E. R. Stauffacher..... 166
Early days in transformers. R. Belfield interview by L. W. W. Morrow 819
Georgia Power Company makes study of Atlanta distribution. J. M. Flanigen 62
Handling speeded by electric car winches *613
Load ration transformers 364
Oil fuses protect small transformers.. 548
Reconnectable motors save transformer investment 126
66- to 60-Kv. tie made with phase-angle control. D. B. McDonald....*960
Special transformers fit inside meter box 1110
Split-core transformer gives flexibility to oscillograph. F. E. Johnson... *66
Summation transformer gives overcurrent protection. R. E. Cordray.*872
Thermal cutouts for transformers.... 622
Three-phase transformer unit improves distribution. F. W. L. Hill.....*1043
Transformer vault ventilation.....*572

Transmission:

Blue Ridge transmission, Canton-Greenville line *218
Bridge-type towers in New Jersey (N).*808
Cables, Transmission and distribution. 32
Carolina & Virginia to have 110-kv. link (N) 938
Carrier-current talk reaches 445 miles (N) 719
Controlling the deflection of suspension insulators. Booker & Hill.....*726
Currents required to remove conductor "sleet." J. E. Clem.....*1053
Difficult angle turn made with braced tower *739
Diverting direct strokes (Wallenpaupack line). A. E. Silver.....*313
Energy transmitted 362 miles at 66 kv. 98
Engineering for better lines at lower cost *584
England starts her first 132-kv. line (N) 718
4,500 kv. surge recorded in Arkansas. J. J. Torok 442
Getting results with minimum material *869
H-beam spacers strengthen strain structures *862
Hot-line tools cut reinsulating cost. G. F. Phythian *486
Illinois—new line opposed (N)..... 200
Impulse ratio limitations. Jones & Lusignan 516
Increasing impulse flashover values..*777
Light-weight "traveler" cuts cost of transmission lines. J. E. Housley.*876
Line design should be simplified (Ed) 340
Lines finished, building or planned (N) 422
Line patrol costs cut in half. B. H. Clark 432
Maine's high-tension line (N)..... 468
Mississippi River crossing requires 3,780 ft. span *582
New construction practices cut rural distribution costs. N. Stahl.....*817
New Orleans completing 300 mile line (N) 200
Outages reduced on European lines.. 521
Paugan-Toronto second line goes into service (N) 509
Peterson coil protection. F. Rudenberg *908
Portable kenotron housing design. C. W. Evans *1178
Pulling both ends of 5,084 ft. span at once. J. E. Housley.....*822
San Joaquin builds for 220 kv. transmission (N) 201
Series capacitors may change several utility practices (Ed) 988
Service controls 15-mile falls transmission. C. A. Booker *443
Sheath currents in single-conductor cables. C. W. Evans..... 957
Shunt tension indicator measures pull on cables 714
Speeding construction of 220-kv. aluminum line. H. J. Kingsley....*647
Straddling transmission tower (N)..*333
Surge indicator locates flashovers...*460
Thyratron tubes studied 210
Toronto-Akron line follows Ohio merger (N) 102
Tower, triangular, for overhead work 326
Towers—radical suggestion (Ed) 60
Waterville hydro makes possible notable interconnection. A. C. Clogher *385
Tree planting as a utility activity (N)... 199
Trucks—Metal line truck bodies increase pay load *589
Winches on trucks deliver by air.... 659
Tunnel—Bridge River tunnel finished (N) 104
Concrete cable tunnels show economy. R. A. Cole *586
Detroit vehicular tunnel (N).....*805
Pipes for tunnel forms.....*905

Turbines:

British unit at Delray station (N)... 463
Buffalo General Electric puts new unit in service (N) 420
Deepwater and Gilbert 1,200 lb. stations report upon performances...1044
Mad River Station. J. W. Mikels....*294
New turbines operate well..... 879
Precautions to assure safety of high-speed rotors 117
Quick-starting turbine-driven generators at Long Beach Station. F. G. Philo *110
Reducing gate leakage saves $36,000 a year 481
Reed Station of Duquesne Light Co. (picture feature) 953
Safe Harbor turbines now under contract (N) 630
Service availability increases during 1929 917
Steam turbine development (Ed).... 293
Vertical—compound turbine *150
Waukegan installs new generator (N) 674

U

Ultra-Violet Rays:

Affect illumination of the future? (Ed) 204
Artificial sunlighting now challenges the sun. M. Luckiesh.....*1035
Industrial uses. Free & Clark..... 873
Natural vs. artificial sources as ultra-violet radiators 916
New ultra-violet lamp for use in lighting circuit 949
Ultra-violet rays, see also Lights and Lighting.
